CORENERGY Fitness Roller is a more **stable** and **versatile** alternative to the "exercise ball"; its many functions include, but are not limited to:

- *Stretching your spine thoroughly
- Abs / Core strengthening routines
- Leg & back strengthening routines
- Side crunches
- Sit on it like a stool
- Body centered psychotherapy poses
- If you do Yoga, Pilates, Gymnastics

**More effective at stretching the spine because it does not collapse like the ball.*
